

Camp deployment in any environment requires efficient perimeter watch. Ortech is specialized in planning and executing complete watchtower system for any facility, taking into consideration all functional, environmental and operational parameters and civil/military threat.

Ortech watchtowers sustain blast and ballistic penetration according to national and international standards.

Protection level of the individual tower and access may vary according to the local threat analysis, operational routines, personnel and equipment in the tower.

The towers are prefabricated in the factory and delivered for final assembly on site.

Main Features:

- Detailed planning from the entire watch system to the individual tower.
- A short planning to delivery cycle.
- Different protection levels – according to threat analysis and customer requirements.
- Protected habitable space, windows, access way, power and communications tunnels.

Suitable for:

- Government, military and law enforcement campus
- Factories and processing facilities
- Power and energy facilities
- Airports, naval and land hubs
- Border checkpoints
- Storage and logistics of essential resources
- Detention facilities
- Arms and ammunition storage
